Groups

Groups can be used to manage how calls are handled for a selection of callers. Hunt Groups will pass calls to the next available member. Call Pickup Groups allow lines to answer each other's calls.

Hunt Groups (MHGs) Call Pickup Groups

All Lines

The All Lines pages provide access to details of all lines in the business group. These can be filtered by User Lines, Attendants and Group Access Lines. Manage the phones in your Business Group and assign them to lines from the Phones page.

# Updating/ Uploading Music on Hold

Once on the 'Resources' tab, you will be able to browse local file. Select the wave file you are looking to use and then click "Add" to upload the file and assign it to any number you would like.

ID	Description	Upload local resource file	Actions
<input type="text" value="76"/>	<input type="text" value="Music on Hold 76"/>	<input type="button" value="Choose File"/> Menu 2-initia...ting (1).wav	<input type="button" value="Add"/>

Once a file is uploaded, you can then select which location you are looking to use this Music on Hold for on the 'Mappings' tab.

# Updating/ Uploading Music on Hold

**Repeat** – The recording is played on a loop.

**Play Once** – The recording (initial resource) is played once, and then the follow-up recording (follow-up resource) is played on a loop.

**Repeat – Initial Interrupted** – The initial recording (initial resource) will be interrupted at set intervals by the follow-up recording (follow-up resource). This could be used to interrupt music with an announcement such as “Please continue to hold, your call is important to us”. When you select this option, a “Duration” box appears to allow for you to input how often you want the interruption to happen (i.e. every 15 seconds)

**Repeat – Follow-up Interrupted** – The initial recording(initial resource) is played first. Then the follow-up recording (follow-up resource) plays continually being interrupted by the first recording (initial resource)

Once selected, you are able to map which numbers will play which music on hold. These can be Granite provided standard files or the Music on Hold that was uploaded. You can do this number by number or set a default. Once selected click “**Save**”
