FOR IMMEDIATE RELEASE – MAY 10, 2012

GRANITE ANNOUNCES LEADING EDGE DISASTER RECOVERY PLAN

Granite Partners with Industry Leaders EMC and SunGard to Enhance Disaster Recovery Plans

“Granite is committed to providing unparalleled service to our customers every day including the avoidance of service interruptions in the event of a disaster. We are enhancing those capabilities with the help of our world class partners”, stated Rand Currier, Granite’s Chief Operating Officer.

Granite has redundant servers with EMC data equipment at its headquarters and remote sites. Additionally, Granite has purchased an EMC system to store and maintain all of its data utilizing a suite of integrated storage solutions.

Granite recently signed a long term agreement with SunGard, the nationwide leader in disaster recovery to upgrade and manage Granite’s remote back up sites and connectivity. This will ensure in the event of a disaster all data will be protected and customers will have continual access to Granite’s service teams at its headquarters or remote sites.

Granite has grown from a start up in 2002 to now employing over 900 people and has over 1.2 million phone lines for over 14,000 corporate customers throughout the United States and Canada including two-thirds of the Fortune 100 in the United States. Granite’s services include telephone services, broadband data networking, alarm, and other telecommunications related products. Granite recently won a United States Postal Service Supplier Excellence Award and has been recognized as one of the healthiest companies to work for in the Boston metropolitan area.
