NEXT GEN INFRASTRUCTURE

Granite Guardian FlexEdge is the all-in-one universal customer premise equipment (uCPE) consolidating up to five different on-site devices eliminating hardware maintenance on a massive scale.

FlexEdge is capable of fulfilling each or all of the following functions, offering flexibility and cost savings to our customers:

- Terminate an Ethernet circuit
- Connect a Broadband modem
- Integrated 4G/5G wireless backup
- Install a proxy server to deliver Guardian Advanced monitoring
- Run an instance of any Granite's SD-WAN or Security solutions
- Install an eSBC to run all of Granite's VoIP offerings
- Bring Your Own Software

BENEFITS

FLEXIBILITY

The FlexEdge platform is built on the foundation of supporting changing business demands. Adding, changing and removing services are as simple as selecting which VNFs (virtual network functions) to augment or remove.

SPEED OF DEPLOYMENT

Since we are using commercial off-the-shelf (COTS) hardware and all network elements delivered as software licenses, Granite's ability to rapidly deliver and scale solutions are solidified. The entire process is automated from end-to-end, and deployments from 1 to 10,000 edge devices can be rolled out without managing different supply chains.

SERVICE ON DEMAND

Trials and service augments can be done with no truck roll creating an immediate feedback loop and a faster time to cost reduction and improved visibility.
