## 20 Most Promising Unified Communications Solution Providers 2015

In the modern world where enterprises are spread out in different geographical locations there is necessity for a collaborative media experience across any workspace. Since business communication plays a vital role in the growth of organizations, several companies are adopting Unified Communications which enables a firm to communicate seamlessly via a wide range of integrated components and would arguably better facilitate all types of communication. On the other end of the spectrum, UC is evolving continuously with new trends to empower new correspondence modules for a superior client experience. Presently, companies are deploying and leveraging UC for automation of processes, voice over LTE (VoLTE)/voice over Wi-Fi, voice, video, and messaging services, amongst others to enrich productivity. Moreover, UC vendors are trying to integrate more features into wireless devices to better

serve the users, who mostly depend on tablets and mobiles for everyday tasks.

With so much under the UC banner, we at CIOReview looked at scores of solution providers and have shortlisted the ones that are at the forefront of tackling challenges faced in the UC landscape. In our selection we have looked at vendors offering a wide range of UC suites that will help in setting up a strong communication platform for businesses.

The companies featured have showcased in-depth expertise in integrated and innovative technologies to streamline operations across the Unified Communications field. A distinguished panel comprising of CEOs, CIOs, VCs, industry analysts and the editorial board of CIOReview selected the final 20.

We present to you CIO Review's 20 Most Promising Unified Communications Solution Providers 2015.
